Profile

Results-driven Full-Stack Developer with over 2 years of working experience creating responsive, user-centric applications. Skilled in modern web technologies, delivering high-quality code and innovative solutions for startups, agencies, and clients.

Professional Experience

March 2023 – present
Remote

Faaji, Frontend Developer
- Work with every branch of the team, projects launches & development using VueJs & NuxtJs.
- Led migration from VueJs to Nuxt 3 and developed reusable components to accelerate development.
- Improved code quality through refactoring, optimizing the PWA's performance and scalability.
- Spearheaded the Frontend development of multiple projects, enhancing UX across applications.

January 2024 – September 2024
Contract

Acada Power, Frontend Developer
- Built and optimized user interfaces for admin, parent, and student dashboards, enhancing the user experience across key components of the SMSS.
- Worked closely with backend and UX teams to integrate new data visualization features and streamline the UI, leading to a more intuitive user experience.

July 2024 – September 2024
Freelance

Knots & Landings Marine, Fullstack developer
- Developed website from ground up as the ultimate boating marketplace, where users can explore, buy, and request to feature their boats, combining a seamless UX with functionality.
- Engineered a responsive Frontend to provide an immersive browsing experience, with advanced search and filtering options to help users find their ideal boat.
- Utilized NextJs to ensure a scalable, high-performance platform ready to support a large user base and frequent Boat & Engine uploads.

April 2024 – June 2024
Freelance

Translynx Marine, Frontend Developer
- Independently designed and built the Translynx Marine website, aligning with company brand guidelines and incorporating partner branding on select pages to ensure a cohesive, professional look.
- Developed a fully responsive and user-friendly interface, optimizing for seamless navigation and visual appeal across devices.
- Utilized NextJs & TailwindCSS to achieve a high-performance site that meets both functional and aesthetic goals.

September 2023 Freelance	**Afrojazz Fest,** Frontend Developer
	• Rapidly developed and deployed a landing page to promote an upscale musical event, completing the project within hours. • Implemented a Firebase backend to securely collect emails from interested attendees, enhancing event outreach. • Designed the interface based on the event flyer, maintaining visual alignment with promotional materials.
December 2022 – February 2023 Freelance	**Freelance,** Frontend Developer
	• Built the frontend for a policy management application using ReactJs in collaboration with a senior engineer, facilitating efficient handling of authorization policies through a user-friendly interface.
March 2022 – April 2023 Freelance	**Saturn Fi,** Frontend Developer
	• Developed an engaging landing page for SaturnFi's financial automation service using ReactJs and CSS.
